

## **The Dance of Change**

“Every successful learning initiative requires key people to allocate hours to new types of activities: reflection, planning, collaborative work and training.”

The recent advancement in Science and Technology has placed new educational and societal demands upon the Region/Division supervisors, school administrators, and teachers. The fast rate of change in recent years accelerated to the highest levels of imagination of DepED Region VII. The way of life and the culture of employees are being constantly alerted. Scientific and Technological innovations appeared so fast that the theory and practice of the Art of Science Education have failed to keep pace with the technological demands.

Supervisors, school managers, and everybody in DepED Region VII, especially the 19 Schools Division Superintendents and their chief stewards, must be constantly alert to develop fresh mental outlook if they are to keep abreast with change and meet the demands placed upon them by those whom they are serving.

Our Regional Director, Dir. Recaredo G. Borgonia, has encouraged everybody in the new structure to adopt and implement the new technological practices like Biometrics and teleconferencing to lessen the time from lagging between the discovery and application of new knowledge. We are going paperless with the use of laptops during Regional Executive Conference & Regional Conference with the Chiefs and staff members of the Functional Divisions. It is for this reason that the Regional Office is providing laptops to all regional employees in the region. This is the dance of change that everyone has to take. **CCD**
